What is Runbot?

Runbot, a platform that allows users to build, backtest, and execute automated trading strategies. The potential of a partnership between these two platforms is immense, promising to deliver a seamless and efficient trading experience for users.

Why?

Runbot is known for its professional-grade trading alerts and easy-to-use strategy builder. It offers access to best-in-class market indicators and allows users to connect their automated strategies to other services. Runbot's alerts can be received and customized on various platforms, enhancing the

user's ability to respond quickly to market changes.

Features?

One of the standout features of Runbot is its NFT marketplace for strategy templates. This marketplace not only allows users to explore and acquire strategies developed by top algorithmic traders, thereby receiving high-quality alerts, but also provides an opportunity for users to sell their own unique strategies, creating a potential revenue stream. Additionally, Runbot's strategy builder requires no coding, making it accessible to traders of all levels.
